

Accounting & Finance

About this course

This course teaches key accounting concepts and principles to illuminate financial statements and unlock critical insights into business performance and potential. In this course you will explore how managers, analysts, and entrepreneurs leverage accounting to drive strategic decision-making.

This course will teach you the fundamentals of financial accounting. Starting with the basics of recording transactions as journal entries and posting them to T accounts, you will learn how to prepare a balance sheet, income statement, cash flow statement and one of the most widely used professional Accounting Software.

This course is for you if

- ✓ You are a business owner and wants to know your company through Accounting
